

COMMENTS ON THE FILES IN THIS ATTACHMENT

In this attachment all the simulation results from GT Pro, STEAM Pro and Thermoflex are gathered in the file "Results CHP simulations"

All files utilised to obtain the results are found in the folder "Simuleringsfiler".

All results regarding the primary energy factor calculations are found in "Results PEF calculations". The excel calculation tool could not be attached due to copyright issues. If further details regarding this tool are required by the reader, he or she should contact Monica Berner at monica.berner@sintef.no.

Lastly, the attachment contains proofs for the equations presented in section 7.1.2. These are found in the folder "Bevis, etc..."
