

# **Wolverine Engineering**

## **Data Book II**

## **Acknowledgement**

Wolverine Tube Inc.  
wishes to express its appreciation to  
Dr. K. J. Bell and Dr. A. C. Mueller  
for authorship of this manual.

Acknowledgement is made in the text for  
material which has been used  
from other sources.

## **TABLE OF CONTENTS**

### **Chapter 1 Basic Heat Transfer**

<b>Section 1</b>	<b><u>Basic Mechanisms of Heat Transfer</u></b>	
	<u>Conduction</u>	6
	<u>Single Phase Convection</u>	8
	<u>Two Phase (Liquid-Gas/Vapor) Flow</u>	11
	<u>Condensation</u>	14
	<u>Vaporization</u>	17
	<u>Radiation</u>	19
<b>Section 2</b>	<b><u>Basic Heat Exchanger Equations</u></b>	
	<u>The Overall Heat Transfer Coefficient</u>	21
	<u>The Design Integral</u>	23
<b>Section 3</b>	<b><u>The Mean Temperature Difference</u></b>	
	<u>The Logarithmic Mean Temperature Difference (LMTD)</u>	25
	<u>Configuration Correction Factors on the LMTD</u>	27
<b>Section 4</b>	<b><u>Construction of Shell and Tube heat Exchangers</u></b>	
	<u>Why a Shell and Tube Heat Exchanger?</u>	32
	<u>Basic Components of Shell and Tube Heat Exchangers</u>	32
	<u>Provisions for Thermal Stress</u>	35
	<u>Mechanical Stresses</u>	37
	<u>The Vibration Problem</u>	37
	<u>Erosion</u>	38
	<u>Cost of Shell and Tube Heat Exchangers</u>	38
	<u>Allocation of Streams in a Shell and Tube Exchanger</u>	39
<b>Section 5</b>	<b><u>Application of Extended Surfaces to Heat Exchangers</u></b>	
	<u>The Concept of the Controlling Resistance</u>	40
	<u>Types of Extended Surface</u>	40
	<u>Fin Efficiencies and Related Concepts</u>	41
	<u>The Fin Resistance Method</u>	43
	<u>Some Applications of Finned Tubes</u>	45

<b>Section 6</b>	<b><u>Fouling in Heat Exchangers</u></b>	
	<u>Typical Fouling Resistances</u>	45
	<u>Types of Fouling</u>	45
	<u>Effect of Fouling on Heat Transfer</u>	46
	<u>Materials Selection for Fouling Services</u>	46
	<u>Removal of Fouling</u>	47

## **Chapter 2 Sensible Heat Transfer**

<b>Section 1</b>	<b><u>Heat Exchangers with Low- and Medium-Finned Trufin</u></b>	
	<u>Areas of Application</u>	58
	<u>Description of Low- and Medium-Finned Trufin</u>	59
<b>Section 2</b>	<b><u>Basic Equations for Heat Exchanger Design</u></b>	
	<u>The Basic Design Equation and Overall Heat Transfer Coefficient</u>	60
	<u>Fin Efficiency and Fin Resistance</u>	61
	<u>Mean Temperature Difference, F Factors</u>	62
<b>Section 3</b>	<b><u>Heat Transfer and Pressure Drop during Flow across Banks of Trufin Tubes</u></b>	
	<u>Heat Transfer In Trufin Tube Banks</u>	72
	<u>Pressure Drop During Flow Across Banks of Low-Finned Trufin Tubes</u>	74
	<u>Effect of Fouling on Trufin</u>	76
<b>Section 4</b>	<b><u>Heat Transfer and Pressure Drop Inside Tubes</u></b>	
	<u>Heat Transfer and Pressure Drop in Single Phase Flow inside Round Tubes</u>	77
	<u>Heat Transfer in Two-Phase Flow Inside Tubes</u>	83
<b>Section 5</b>	<b><u>Preliminary Design of Shell and Tube Heat Exchangers</u></b>	
	<u>Basic Principles of Design</u>	85
	<u>Preliminary Design Decisions</u>	86
	<u>Procedure for Approximate Size Estimation</u>	89
<b>Section 6</b>	<b><u>Delaware Method for Shell-Side Rating of Shell and Tube Heat Exchangers</u></b>	
	<u>Introduction</u>	96
	<u>Calculation of Shell-Side Geometrical Parameters</u>	97
	<u>Shell-Side Heat Transfer Coefficient Calculation</u>	106
	<u>Shell-Side Pressure Drop Calculation</u>	107

<b>Section 7</b>	<b><u><a href="#">Examples of Design Problems for Low- and Medium-Finned Trufin in Shell and Tube Heat Exchangers</a></u></b>	
	<u><a href="#">Design of a Compressor After-cooler</a></u>	116
	<u><a href="#">Design of a Gas Oil to Crude Heat Recovery Exchanger</a></u>	122

## **Chapter 3 Condensing Heat Transfer**

<b>Section 1</b>	<b><u><a href="#">Trufin Tubes in Condensing Heat Transfer</a></u></b>	
	<u><a href="#">Modes of Condensation</a></u>	142
	<u><a href="#">Areas of Application</a></u>	142
	<u><a href="#">Types of Tubes Available</a></u>	143
<b>Section 2</b>	<b><u><a href="#">Condensation of Vapor inside High-Finned Trufin Tubes</a></u></b>	
	<u><a href="#">Vapor-Liquid Two-Phase Flow</a></u>	144
	<u><a href="#">Condensation Heat Transfer</a></u>	154
	<u><a href="#">Mean Temperature Difference for In-Tube Condensation</a></u>	162
<b>Section 3</b>	<b><u><a href="#">Condensation of Vapor outside Low- and Medium-Finned Trufin Tubes</a></u></b>	
	<u><a href="#">Shell and Tube Heat Exchangers for Condensing Applications</a></u>	166
	<u><a href="#">The Basic Design Equations</a></u>	172
	<u><a href="#">Mean Temperature Difference</a></u>	173
	<u><a href="#">Condensation of a Superheated Vapor</a></u>	173
	<u><a href="#">Condensation with Integral Sub-cooling On the Shell-side</a></u>	174
	<u><a href="#">Film-wise Condensation on Plain and Trufin Tubes</a></u>	178
	<u><a href="#">Film-wise Condensation on Tube Banks</a></u>	180
	<u><a href="#">Pressure Drop during Shell-side Condensation</a></u>	181
<b>Section 4</b>	<b><u><a href="#">Examples of Design Problems for Low- and Medium-Finned Trufin in Shell and Tube Condensers</a></u></b>	
	<u><a href="#">Condenser Design for a Pure Component: Example Problem</a></u>	182
	<u><a href="#">Condenser Design for a Multi-component Mixture: Example Problem</a></u>	192

## **Chapter 4 Trufin Tubes in Air-cool Heat Exchangers**

<b>Section 1</b>	<b><u><a href="#">Heat Exchangers with High-Finned Trufin Tubes</a></u></b>	
	<u><a href="#">Areas of Application</a></u>	208
	<u><a href="#">High-Finned Trufin</a></u>	209
	<u><a href="#">Description of Equipment</a></u>	210

<b>Section 2</b>	<b><u>Heat Transfer with High-Finned Trufin Tubes</u></b>	
	<u>Fin Temperature Distribution and Fin Efficiency</u>	215
	<u>Effect of Fouling on High-Finned Trufin</u>	217
	<u>Contact Resistance in Bimetallic Tubes</u>	218
<b>Section 3</b>	<b><u>Heat Transfer and Pressure Drop in High-Finned Trufin Tube Banks</u></b>	
	<u>Heat Transfer Coefficients in Cross-flow</u>	219
	<u>Mean Temperature Difference in Cross-flow</u>	221
	<u>Pressure Drop in Cross-flow</u>	223
	<u>Other Air-Side Pressure Effects</u>	225
<b>Section 4</b>	<b><u>Preliminary Design Procedures</u></b>	
	<u>Principles of the Design Process</u>	226
	<u>Selection of Preliminary Design Parameters</u>	226
	<u>Fundamental Limitations Controlling Air-cool Heat Exchanger Design</u>	228
<b>Section 5</b>	<b><u>Final Design</u></b>	235

## **Chapter 5 Trufin Tubes in Boiling Heat Transfer**

<b>Section 1</b>	<b><u>Boiling Theory</u></b>	
	<u>Pool Boiling Curve</u>	240
	<u>Nucleation</u>	242
	<u>Nucleate Boiling Curve</u>	243
	<u>Maximum or Critical Heat Flux</u>	244
	<u>Film Boiling</u>	245
	<u>Boiling Inside Tubes</u>	246
	<u>Sub-cooling and Agitation</u>	246
<b>Section 2</b>	<b><u>Vaporizers - Types and Usage</u></b>	
	<u>General</u>	248
	<u>Boiling Outside Tubes</u>	248
	<u>Boiling Inside Tubes</u>	250
	<u>Other Types of Evaporators</u>	252
<b>Section 3</b>	<b><u>Boiling Heat Transfer</u></b>	
	<u>Pool Boiling - Single Tube</u>	254
	<u>Single Tube in Cross Flow</u>	258
	<u>Boiling on Outside of Tubes in a Bundle</u>	258

# WOLVERINE TUBE HEAT TRANSFER DATA BOOK

	<a href="#"><u>Boiling Inside Tubes</u></a>	259
	<a href="#"><u>Boiling of Mixtures</u></a>	263
<b>Section 4</b>	<b><a href="#"><u>Falling Film Heat Transfer</u></a></b>	
	<a href="#"><u>Vertical In-Tube Vaporizer</u></a>	266
	<a href="#"><u>Horizontal Shell-Side Vaporizer</u></a>	267
