

Analog Output Modules for Compact FieldPoint

NI cFP-AO-200, NI cFP-AO-210

- 8 voltage or current outputs
 - 0 to 10 V
 - 0 to 20, 4 to 20 mA
- 12-bit resolution
- Output ranges software-configurable per channel
- 2,300 V_{rms} bank isolation for transient overvoltage protection
- Hot-swappable with autoconfiguration
- -40 to 70 °C operating range

Module	Input Channels	Resolution	Output Types	Output Ranges (Software Configurable per Channel)	All Channel Update Rate ¹
cFP-AO-200	8	12 bits	Current	0 to 20 mA, 4 to 20 mA	200 Hz
cFP-AO-210	8	12 bits	Voltage	0 to 10 V (up to 10 mA/ch)	200 Hz

¹The all-channel update rate refers to the time the module takes to sample all channels. The overall system update rate is affected by other factors, such as the aggregate module update rate and software loop rate. To calculate the system update rate, visit ni.com/info and enter "systemrate."

Overview

National Instruments cFP-AO-2xx devices are versatile analog output modules for Compact FieldPoint that you can use to control valves, gauges, and other industrial actuators. All modules include overranging and onboard diagnostics to ensure trouble-free installation and maintenance. The NI cFP-AO-2xx modules come with NIST-traceable calibration certificates, ensuring accurate and reliable analog control.

Smart I/O Modules

With cFP-AO-2xx modules, you can directly connect to your industrial actuators or units under test and get high-accuracy control. The I/O modules calibrate and scale engineering units to sensor signals, as well as perform self-diagnostics to detect problems with the module or with the wiring such as open current loops. With cFP-AO-2xx modules, your software application writes an engineering value to the I/O module, eliminating the error-prone step of converting voltage or current to binary values. The cFP-AO-2xx modules have an update rate of 200 Hz. Overall data throughput to the controller or PC depends on the software loop speeds and the network speeds.

The cFP-AO-200 includes eight 0 to 20 mA or 4 to 20 mA analog output channels, generated with a 12-bit DAC. Each output channel features a monitoring circuit and LED indicator for open current loop detection. The cFP-AO-200 requires an external power supply that provides 5 to 24 VDC.

The cFP-AO-210 includes eight 0 to 10 V output channels, generated with a 12-bit DAC. Each channel provides a voltage source capable of supplying up to 1 mA. You can obtain up to 10 mA by powering the cFP-AO-210 with an optional external power supply of 15 to 30 VDC.

Isolation

The cFP-AO-2xx modules feature optical bank isolation with 2,300 V_{rms} of breakdown isolation. They do not have channel-to-channel isolation.

Field I/O Connections

Compact FieldPoint modules include a built-in power distribution bus that provides multiple power connections on the module. A field-wired power supply connected to the voltage (V) and common (C) terminals is internally connected to a power distribution bus that offers additional breakout terminals for voltage supply (V_{SUP}) and common (COM). These terminals deliver a convenient way to distribute power to field devices that require external power.

The cFP-AO-200 has:

- 8 current output terminals (I_{OUT})
- 16 common terminals (COM)
- 8 power connections for field devices or current loops (V_{SUP})

The cFP-AO-210 has:

- 8 voltage output terminals (V_{OUT})
- 16 common terminals (COM)
- 8 power connections for field devices or current loops (V_{SUP})

Analog Output Modules for Compact FieldPoint

Specifications

Typical for -40 to 70 °C unless otherwise noted.

Output Characteristics

Number of channels.....	8 single-ended
DAC resolution.....	12 bits, 1 in 4,096

Current Output (cFP-AO-200)

Output range	0 to 20 or 4 to 20 mA, programmable (0 to 21 or 3.5 to 21 mA with overranging)
Output type	Current source (external loop power required)
External loop power.....	5 to 24 VDC
Internal voltage drop.....	3 V
Resistive load	Up to 1 kΩ with 24 VDC supply, up to 100 Ω with 5 V supply
Protection and error detection.....	Short-circuit and open-circuit
Default power-up state.....	0 mA
Resolution	6 μA

Voltage Output (cFP-AO-210)

Output range	0 to 10 V (0 to 10.2 V with overranging)
Output type	Voltage source (external power optional)
External power supply	15 to 30 VDC
Internal voltage drop.....	3 V
Current drive	1 mA sourcing or sinking, 10 mA sourcing with external power supply
Oversvoltage protection	-10 to 20 V
Default power-up state.....	0 V
Resolution	2.5 mA

Isolation Voltage

Maximum isolation voltage	250 V _{rms} , Installation Category II
Channel-to-channel isolation.....	No isolation between channels
Transient overvoltage.....	2,300 V _{rms}

Accuracy

Absolute accuracy (cFP-AO-200).....	0.1% typ, 0.3% max
Gain error (cFP-AO-210)	0.2% typ, 0.4% max
Offset error (cFP-AO-210).....	4 mV typ, 14 mV max
Monotonicity	Guaranteed over temperature range
Offset temperature coefficient	
cFP-AO-200	50 nA/°C
cFP-AO-210	70 μV/°C
Gain temperature coefficient	
cFP-AO-200	40 ppm/°C
cFP-AO-210	20 ppm/°C

Dynamic Characteristics

Maximum update rate	200 updates/s
Slew rate	
cFP-AO-200	0.4 mA/μs
cFP-AO-210	0.5 V/μs

Physical Characteristics

LED indicators	
POWER (green)	Power on and self-test passed
READY (green)	Module configured and ready
Fault status (red).....	Open circuit (cFP-AO-200) or current limit (cFP-AO-210) on channel
Dimensions.....	127.0 by 65.9 by 23.9 cm (5.00 by 2060 by 0.94 in.)
Weight	
cFP-AO-200	113 g (4.0 oz)
cFP-AO-210	115 g (4.1 oz)

Power Requirement

Power from network module	
cFP-AO-200	350 mW

Environment

Operating temperature	-40 to 70 °C
Storage temperature.....	-55 to 85 °C
Relative humidity	10 to 90%, noncondensing

Shock and Vibration

Operating vibration, random (IEC 60068-2-64)	10 to 500 Hz, 5 grms
Operating vibration, sinusoidal (IEC 60068-2-6)	10 to 500 Hz, 5 g
Operating shock (IEC 60068-2-27)	50 g, 3 ms half sine, 18 shocks at 6 orientations; 30 g, 11 ms half sine, 18 shocks at 6 orientations

Analog Output Modules for Compact FieldPoint

Safety and Compliance

Safety

This product is designed to meet the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note: For UL and other safety certifications, refer to the product label or visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Electromagnetic Compatibility

This product is designed to meet the requirements of the following standards of EMC for electrical equipment for measurement, control, and laboratory use:

- EN 61326 EMC requirements; Minimum Immunity
- EN 55011 Emissions; Group 1, Class A
- CE, C-Tick, ICES, and FCC Part 15 Emissions; Class A

Note: For EMC compliance, operate this device according to product documentation.

CE Compliance

This product meets the essential requirements of applicable European Directives, as amended for CE marking, as follows:

- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

Note: Refer to the Declaration of Conformity (DoC) for this product for any additional regulatory compliance information. To obtain the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers: At the end of their life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers and National Instruments WEEE initiatives, visit ni.com/environment/weee.htm.

NI Services and Support

NI has the services and support to meet your needs around the globe and through the application life cycle – from planning and development through deployment and ongoing maintenance. We offer services and service levels to meet customer requirements in research, design, validation, and manufacturing. Visit ni.com/services.

Training and Certification

NI training is the fastest, most certain route to productivity with our products. NI training can shorten your learning curve, save development time, and reduce maintenance costs over the application life cycle. We schedule instructor-led courses in cities worldwide, or we can hold a course at your facility. We also offer a professional certification program that identifies individuals who have high levels of skill and knowledge on using NI products. Visit ni.com/training.

Professional Services

Our NI Professional Services team is composed of NI applications and systems engineers and a worldwide National Instruments Alliance Partner program of more than 600 independent consultants and

integrators. Services range from start-up assistance to turnkey system integration. Visit ni.com/alliance.

OEM Support

We offer design-in consulting and product integration assistance if you want to use our products for OEM applications. For information about special pricing and services for OEM customers, visit ni.com/oem.

Local Sales and Technical Support

In offices worldwide, our staff is local to the country, giving you access to engineers who speak your language. NI delivers industry-leading technical support through online knowledge bases, our applications engineers, and access to 14,000 measurement and automation professionals within NI Developer Exchange forums. Find immediate answers to your questions at ni.com/support.

We also offer service programs that provide automatic upgrades to your application development environment and higher levels of technical support. Visit ni.com/ssp.

Hardware Services

NI Factory Installation Services

NI Factory Installation Services (FIS) is the fastest and easiest way to use your PXI or PXI/SCXI combination systems right out of the box. Trained NI technicians install the software and hardware and configure the system to your specifications. NI extends the standard warranty by one year on hardware components (controllers, chassis, modules) purchased with FIS. To use FIS, simply configure your system online with ni.com/pxiadvisor.

Calibration Services

NI recognizes the need to maintain properly calibrated devices for high-accuracy measurements. We provide manual calibration procedures, services to recalibrate your products, and automated calibration software specifically designed for use by metrology laboratories. Visit ni.com/calibration.

Repair and Extended Warranty

NI provides complete repair services for our products. Express repair and advance replacement services are also available. We offer extended warranties to help you meet project life-cycle requirements. Visit ni.com/services.
