Weekly report: Week 15 of dissertation for Uninett AS on authentication in IoT

by Magnus Bakke & Liang Zhu at Informatics with specialization in network administration at the Norwegian University of Science and Technology

Activities

Monday April 8

We tried to set up the testing server. We installed Apache with mod_wsgi and set up the Django project. There are many dependencies with dependencies with dependencies, and something is broken.

April 9 - April 13

We continued to try to get Apache and mod_wsgi to work, following a number of tutorials. We are still stuck trying to build Apache with Python 3.7. Existing tutorials are not consistent.

Remarks

We are behind schedule due to our problems with Apache.
