

Emma

Teaching assistant

Age: 24 years

Description

Emma is a teaching assistant at NTNU, in the course TDT4140 - Software Engineering. In addition to this, she is a full-time student.

One of her main responsibilities is to facilitate and monitor the progress of the different groups, the overall status and help groups with problems.

Problem

Since there are 45 groups to monitor, Emma could really need a tool to effectively handle this task. As she is going to work with the instructor in the subject, it would also be beneficial to have an easy “communication channel” with the instructor regarding this.
