ABSTRACT

Jørgensen, Leif. 1982. Eel (*Anguilla* sp.) - A small bibliography.
Gunneria 39: 1-66.*

The article contains literature concerning European eel (*Anguilla anguilla*), American eel (*A. rostrata*), and Japanese eel (*A. japonica*). It consists of both an alphabetical list of publications ranked upon authors name and a subject index containing headwords such as age determination, biology, biochemical content, nourishment, catching, catching equipment, maturation, cultivation, diseases, migration, and growth. All together 276 articles are mentioned, dating from 1891, mostly, however, from 1968 onwards.

Leif Jørgensen, Trondhjem biologiske stasjon, N-7000 Trondheim, Norway.

* Contribution No. 204. Trondhjem Biological Station.

INNLEDNING

I de senere år har vi i Norge hatt en økende interesse for ål og ålefangst. Dette har blant annet medført at en rekke privatpersoner og institusjoner også har ytret ønske om å skaffe til veie en oversikt over tilgjengelig litteratur om ål.

I 1980 fikk "Prosjektgruppen for utvikling og produksjon av ål i Trøndelag" en bevilgning fra Norges Fiskeriforskningsråd til bearbeidelse av publiserte og upubliserte data om ål og ålefangst i Midt-Norge. Undertegnede ble engasjert til å utføre arbeidet, og utarbeidet en rapport: "Åleregistreringer i Møre og Trøndelag i perioden 1941-1979; et sammendrag". I forbindelse med dette arbeidet ble det også innsamlet endel generell litteratur og ål som det ikke var rimelig å ta med i den forannevnte rapport. Dette litteratursøket har jeg senere fortsatt og resultatet presenteres nå i denne oversikten.

I tillegg til et vanlig alfabetisk register basert på forfatternavn, har jeg valgt å dele materialet inn i følgende emner: aldersbestemmelse, biologi, biokjemi, ernæring, fangst, fangstredskap, kjønnsmodning, oppdrett, sykdommer, vandring og vekst.

Da en del av materialet er fremkommet ved datasøk har jeg dessverre ikke hatt mulighet til å kontrollere alle referanser mot originallitteraturen.

Siden en vesentlig del av arbeidet som omhandler japansk og amerikansk ål (henholdsvis Anguilla japonica og A. rostra) også vil kunne være aktuelle når det gjelder den europeiske ålen (A. anguilla), har jeg valgt å ta med en del av disse i oversikten. Det er dessuten ført opp en del arbeider som ikke omhandler ål direkte, men hvor denne er nevnt i en eller annen sammenheng.
