

Included in the attachment

Two DELFTship files are included in the 3D model folder

- Full 3D Model is used to extract hull lines and import them into AutoCAD for general arrangement drawings development
- Loading Conditions are used to estimate the intact stability of the vessel and find the center of gravity.

One DWG and one PDF file are included in the General Arrangement folder

- The DWG file is the full model of the general arrangement drawings
- The PDF file is a scaled A0 drawing of the vessel, ready to be printed

The master thesis poster is included and the System Based Ship Design Spreadsheet of the vessel development is included in a excel file.
