

## APPENDIX B

**Table B1** Vascular plant species in Norway obtained from Artsdatabanken (downloaded January 17<sup>th</sup>, 2017). The 1421 species in this list came to Norway before the year 1800. Assessment ID is the unique ID for each species at Artsdatabanken. IUCN category says how threatened each species is in Norway (assessed for the Norwegian Red List from 2015): least concern (LC), near threatened (NT), vulnerable (VU), endangered (EN), critically endangered (CR), data deficient, and not evaluated (NE).

Assessment Id	Scientific name	Norwegian name	IUCN category (in Norway)
