

OPPTEGNING

KJØPMANNSGATA 41
TRANSFORMASJON AV
PARKERINGSBUS

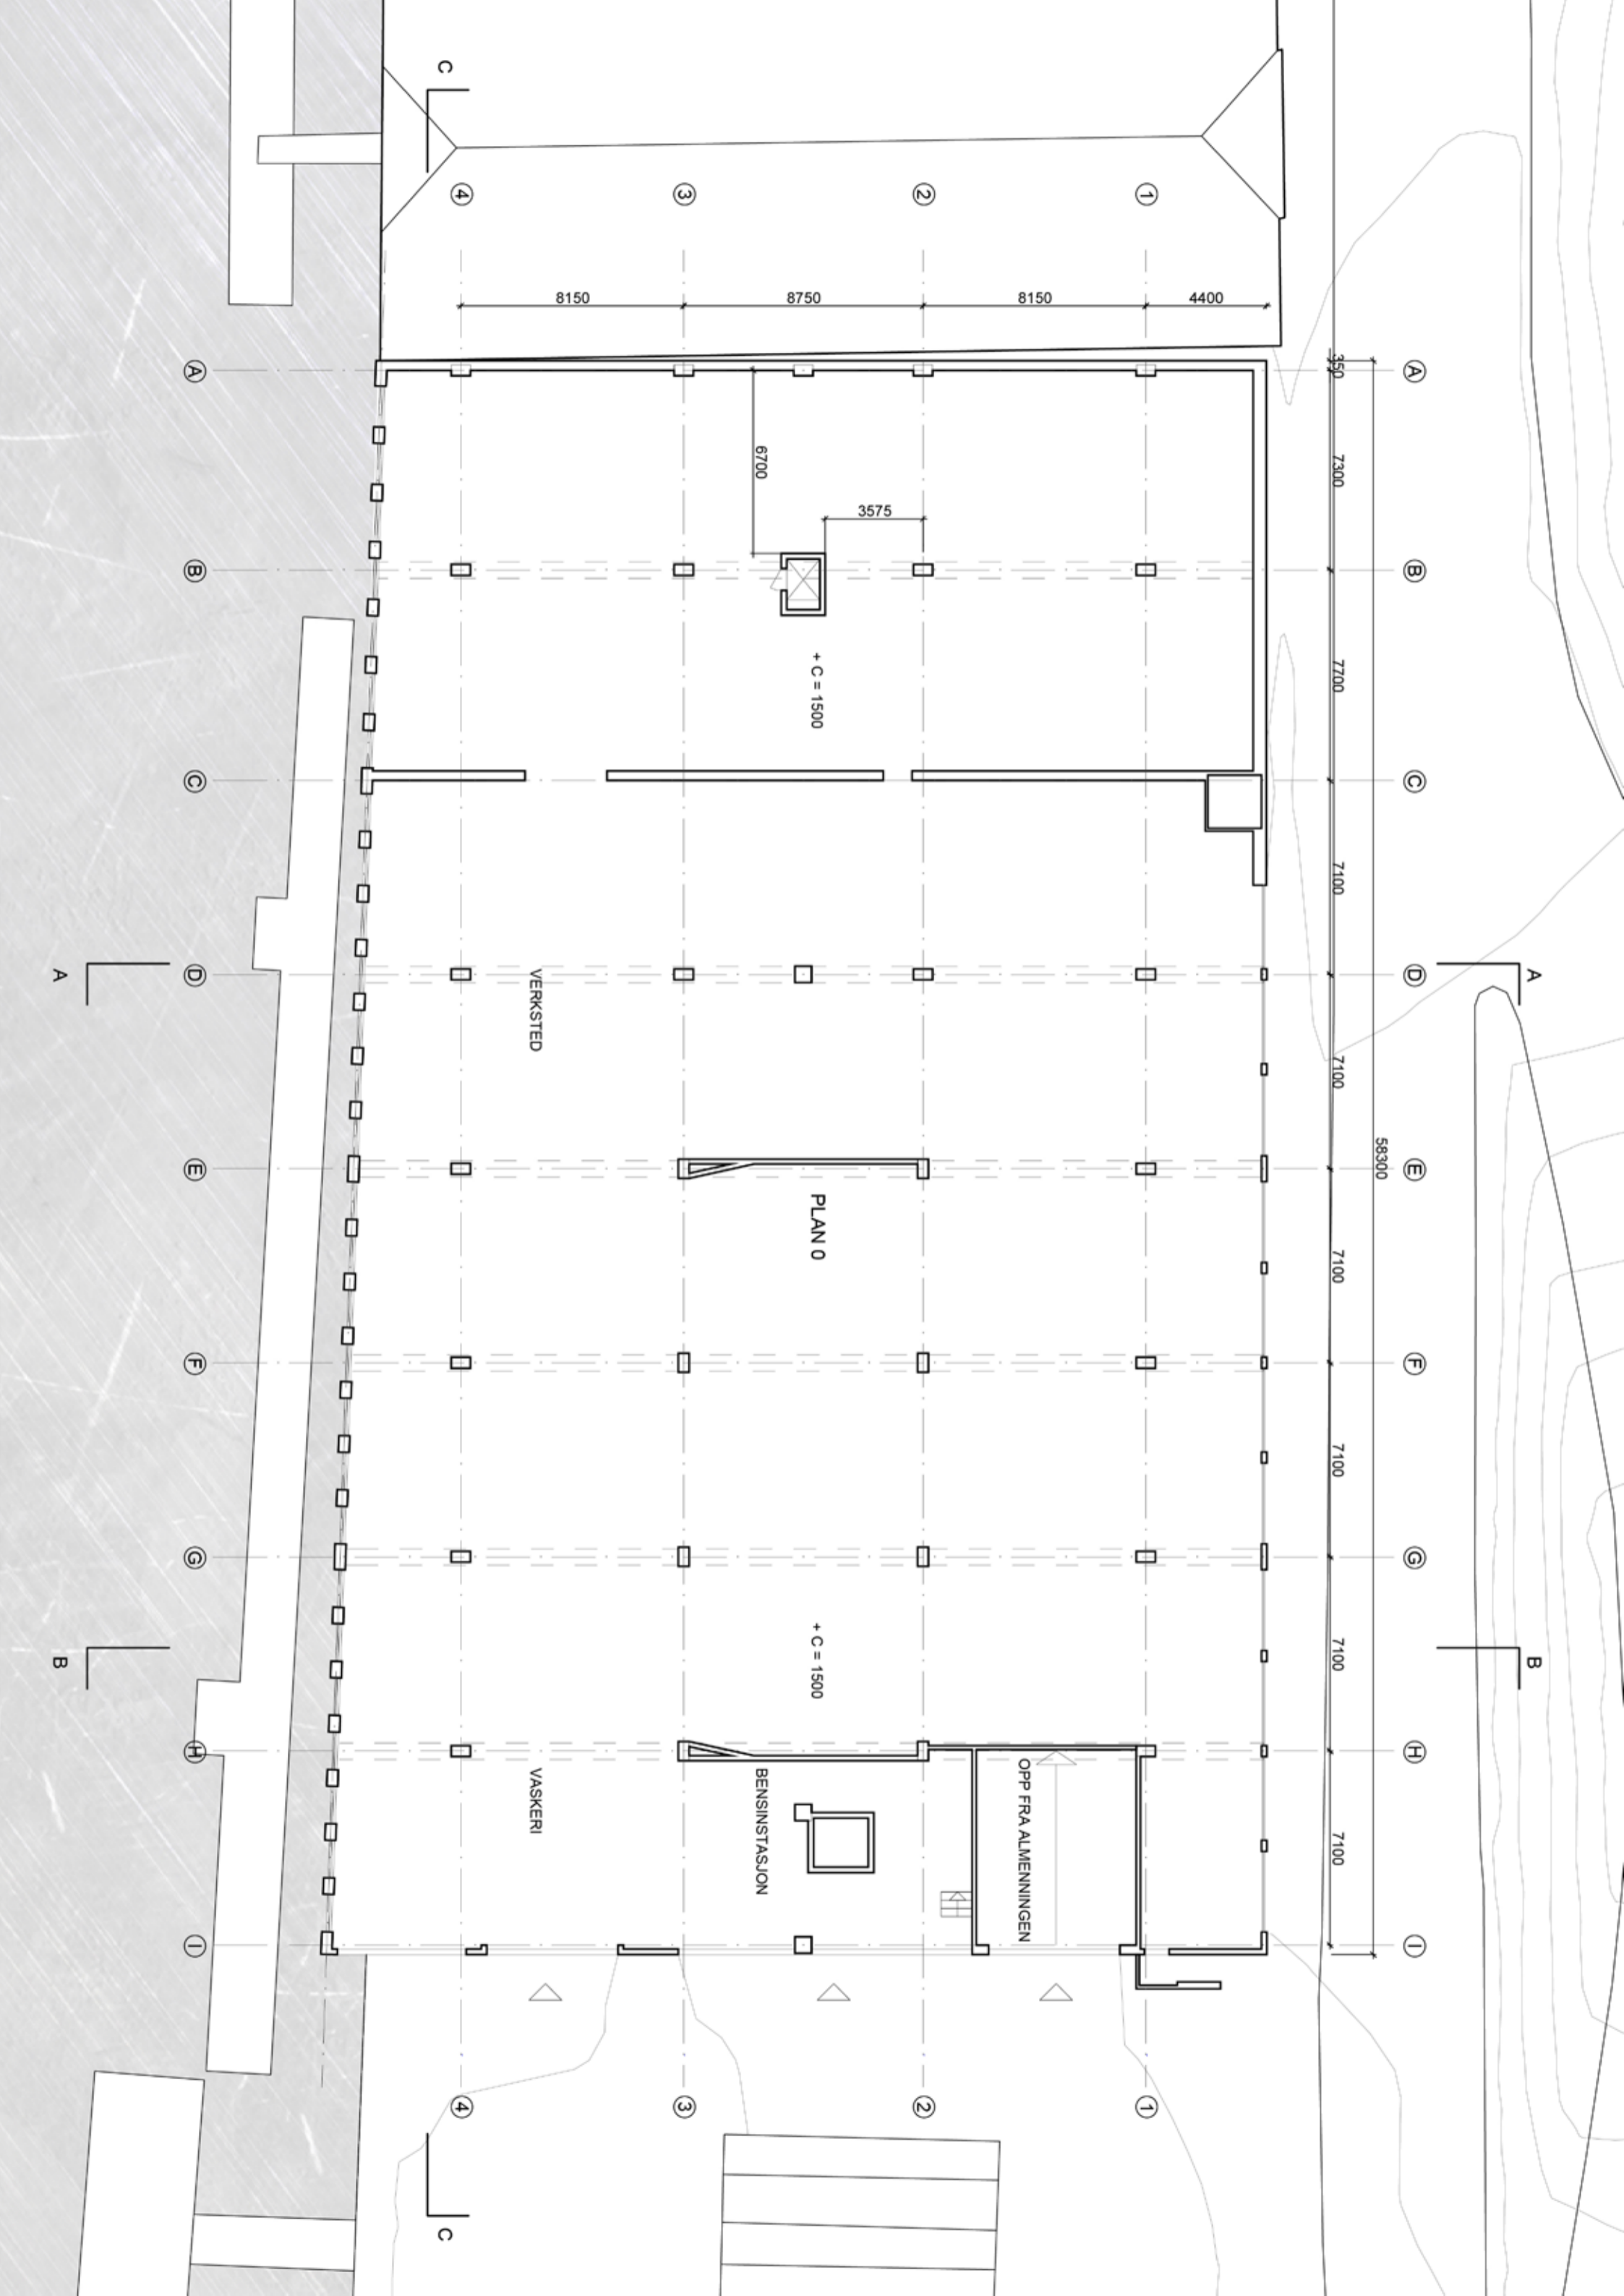

OPPTEGNING og digitalisering av parkeringshuset er nødvendig for å forstå mulighetene som ligger i transformasjon av det eksisterende bygget.

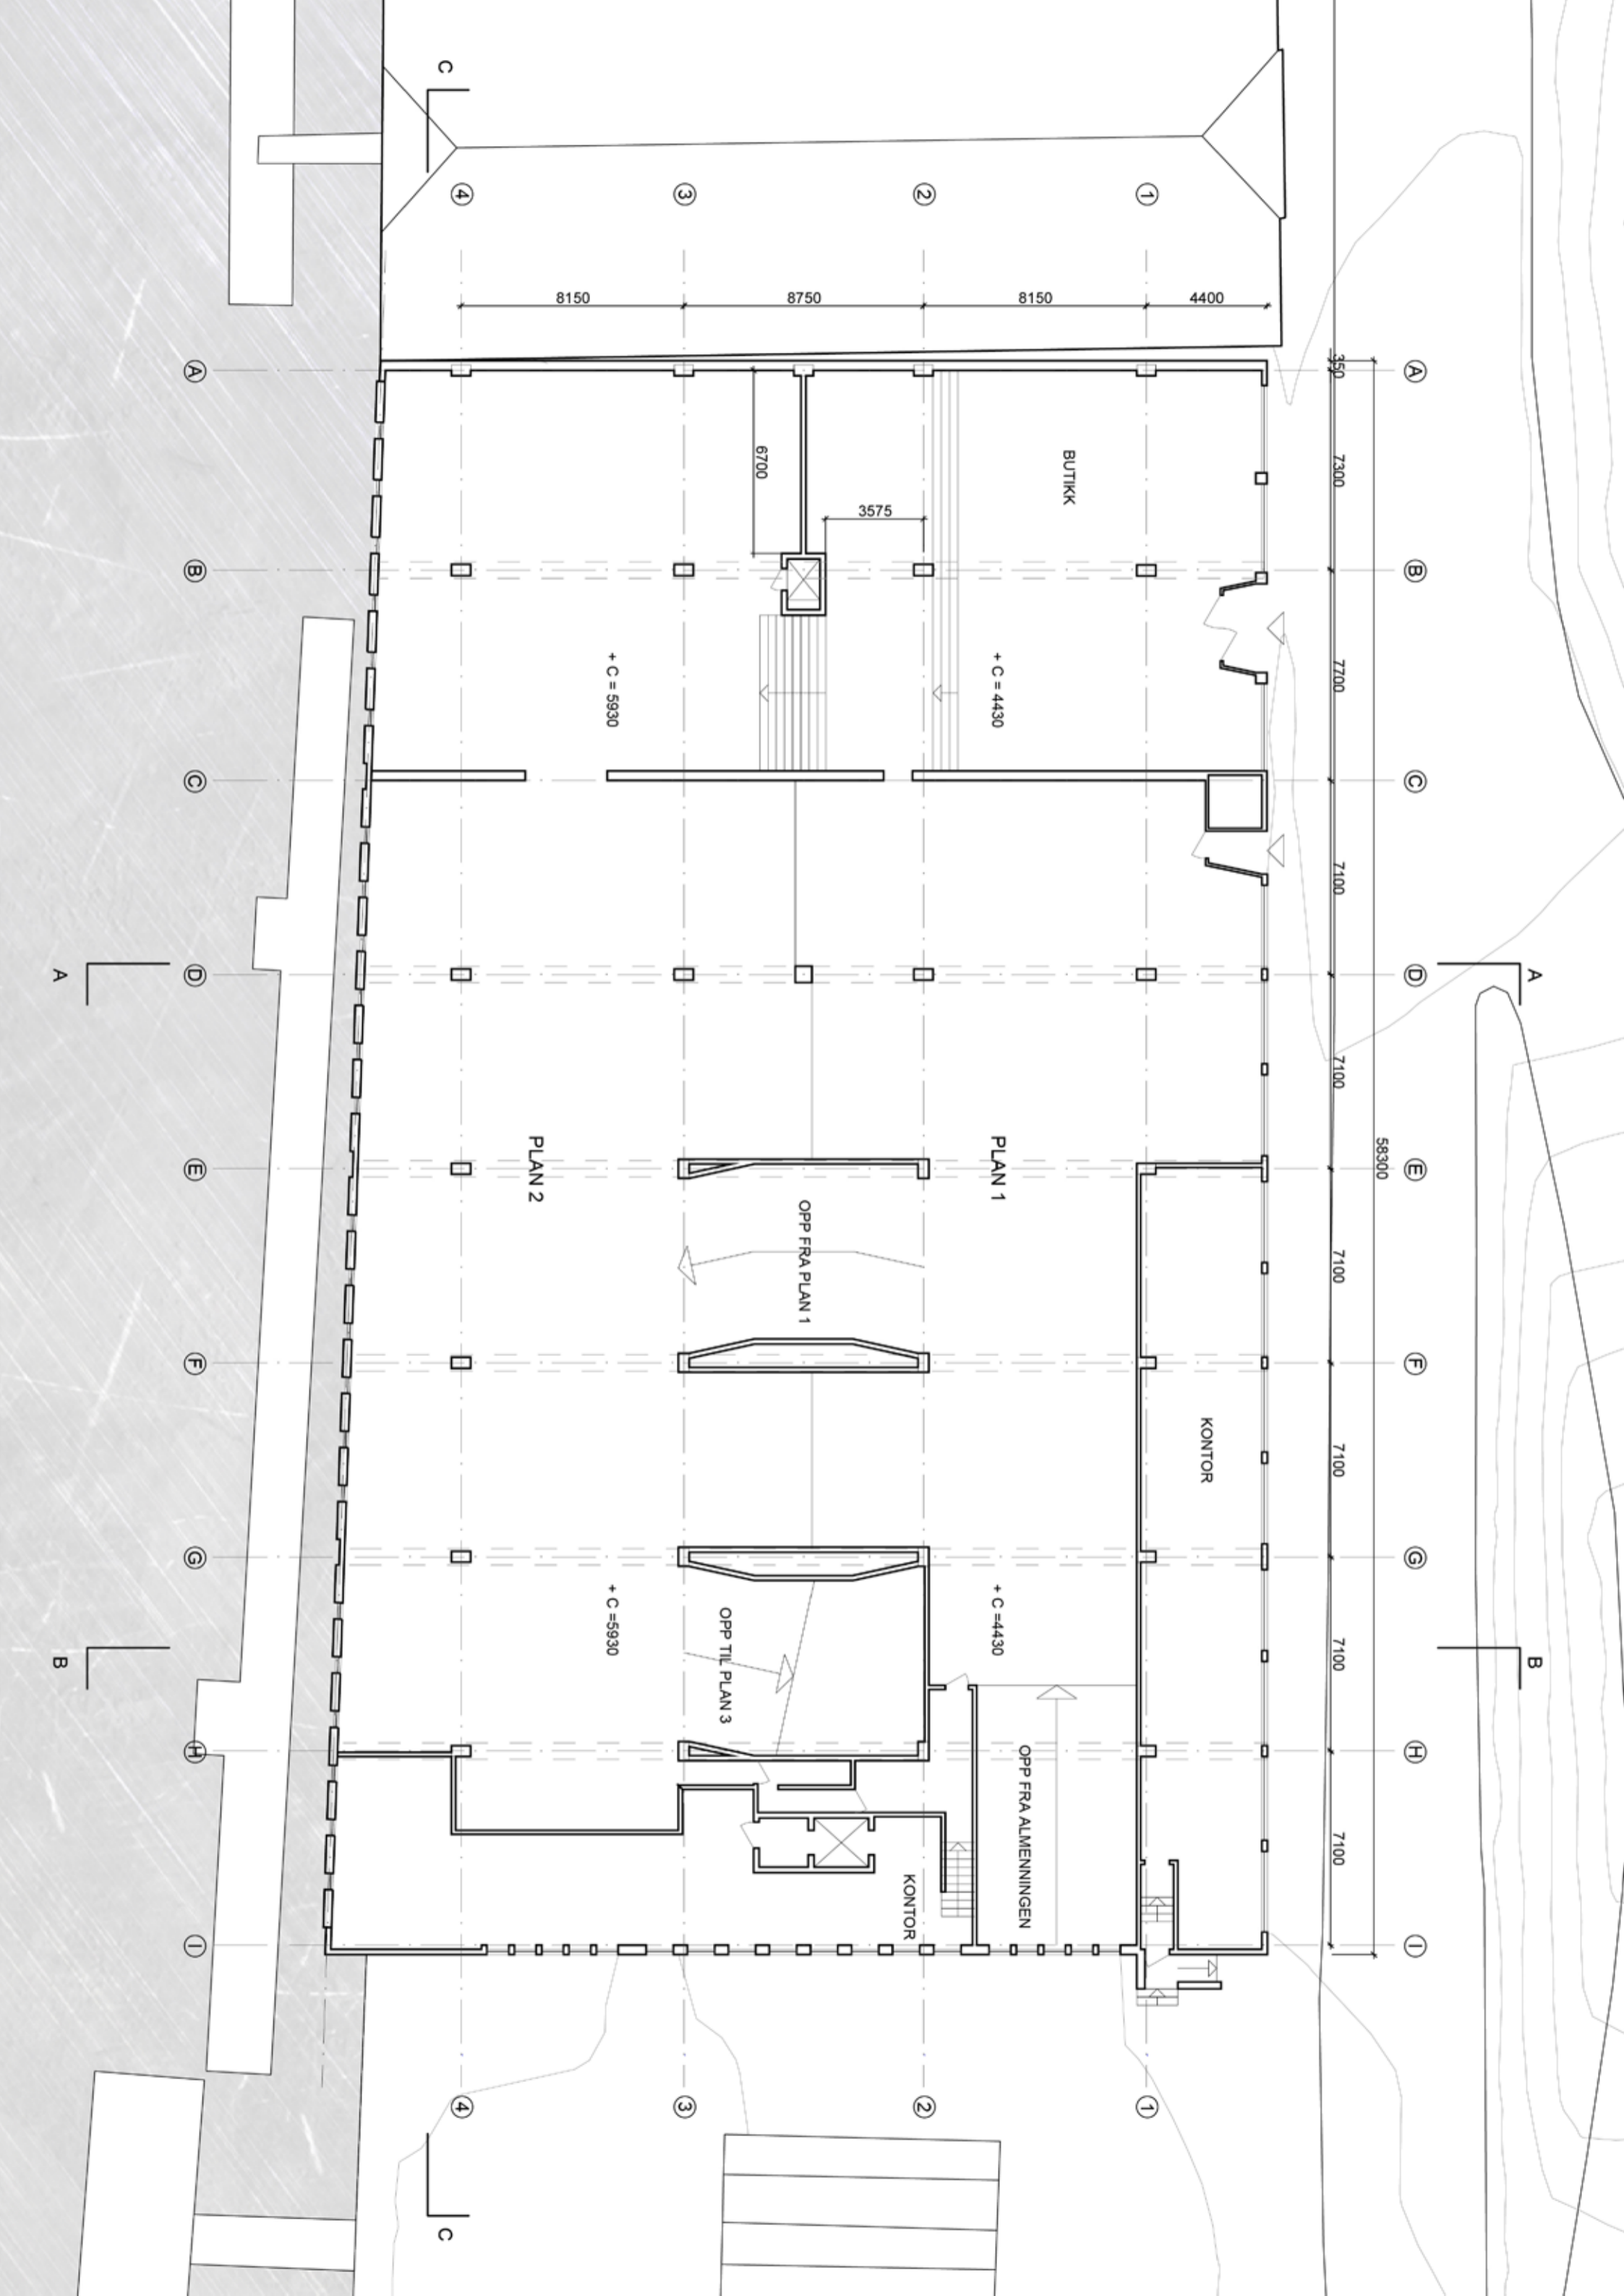

Vi har valgt å fokusere på å løse et komplekst program. Denne masteroppgaven skal derfor ikke regnes som en bygningsvern oppgave. Bilhuset er på ca 10 000 kvadratmeter, det er ikke hensiktsmessig for oss å gjøre en oppmåling. Vi har valgt å basere opptegningen på de originale tegningene til arkitekt Axel Guldahl jr (hvor dette er mulig). Tegningene fra 1958-68, har vi hentet fra byarkivet på Dora. Det har vært et betydelig arbeid i begynnelsen av masteroppgaven å digitalisere disse tegningene slik at vi kan prosjektere effektiv og korrekt.

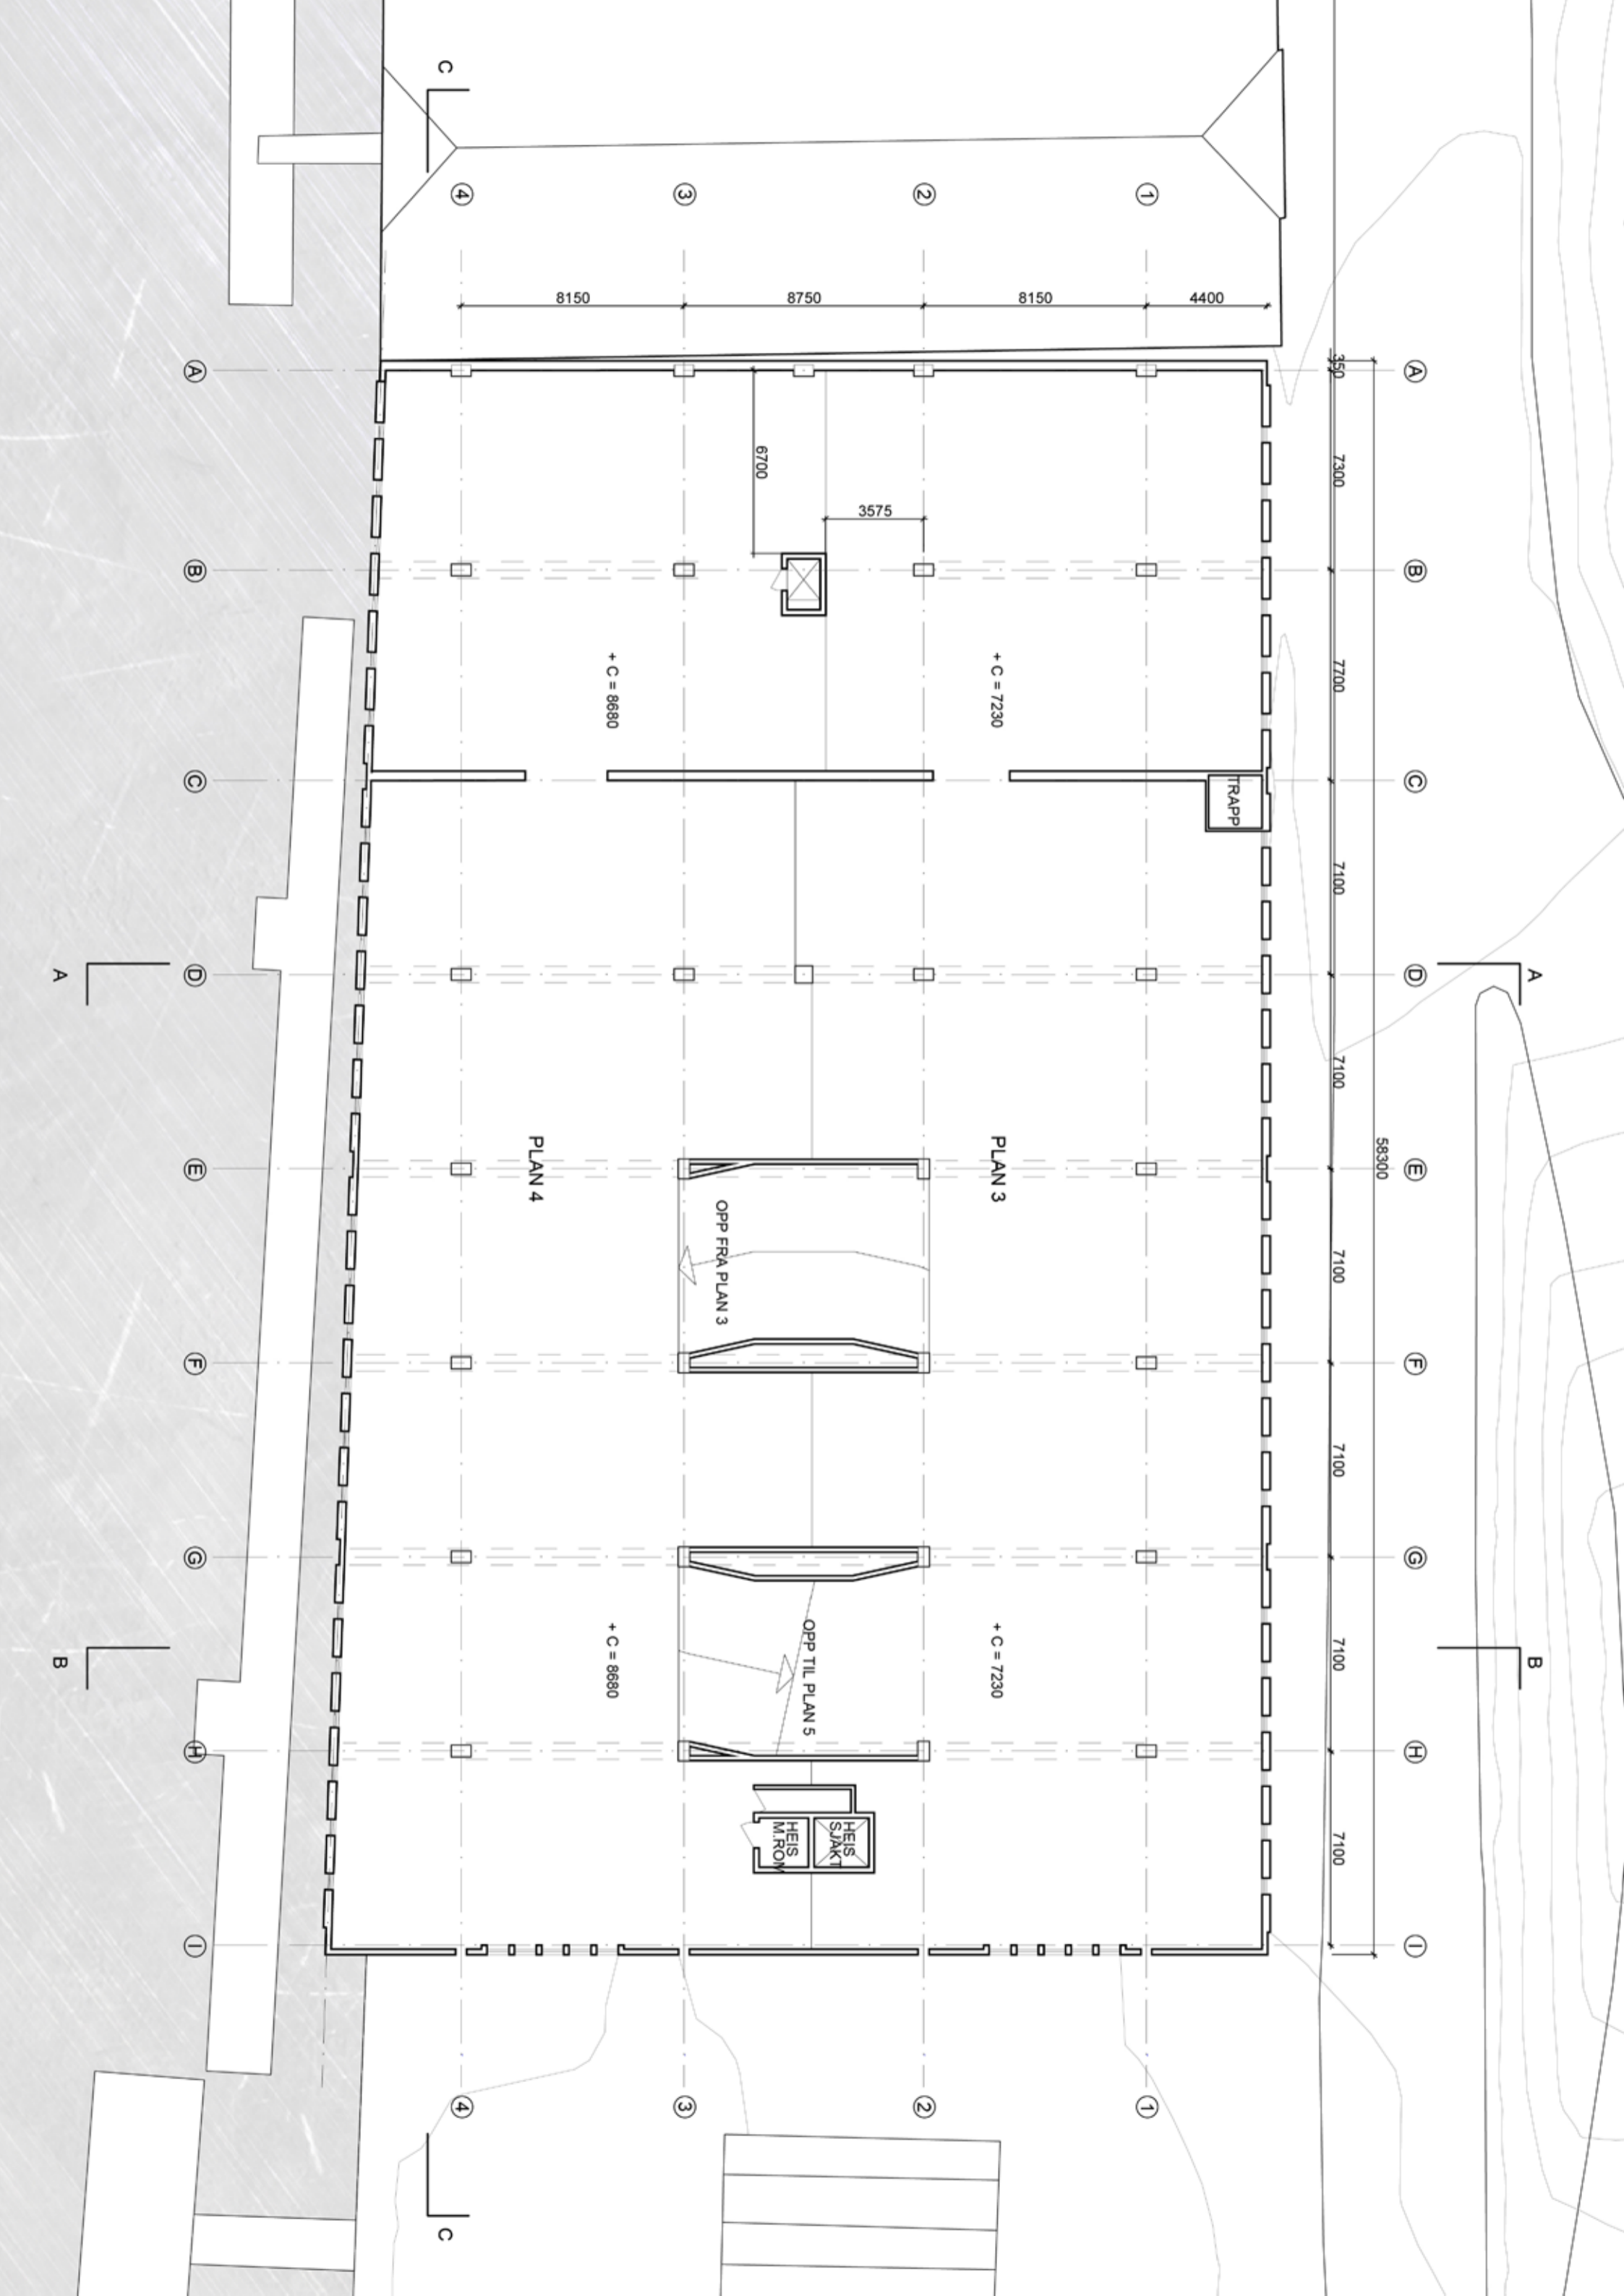

Vi ønsker at med heftet vil man kunne sette seg inn i hvordan bygget er i dag.
