Weekly report: Week 13 of dissertation for Uninett AS on authentication in IoT

by Magnus Bakke & Liang Zhu at Informatics with specialization in network administration at the Norwegian University of Science and Technology

Activities

Monday March 25

The design report was completed. We worked on the execution report after its completion.

Tuesday March 26

We had scheduled a meeting today, but only the candidates showed up. We realized we had forgotten to send out a notice. We appointed Liang as the dedicated meeting organizer from now on.

With the meeting cancelled, we continued to work on the project. We tried to get Ajax to send cookies to the server. The problem is that session cookies are not sent when using jQuery's *ajax* function, but they are sent when

Wednesday March 27

We added validation to the frontend and cleaned up the code a bit. We still need to show a spinning wheel after clicking the *submit* button and show the generated PSK according to our designs, as well as handle failure. We are using alerts at the moment (pop-up message boxes).

March 28 – 31

We worked on the execution report.

Remarks

No remarks.
