Weekly report: Week 20 of dissertation for Uninett AS on authentication in IoT

by Magnus Bakke & Liang Zhu at Informatics with specialization in network administration at the Norwegian University of Science and Technology

Activities

Monday May 13

We developed a basic admin dashboard that allows administrators to view registered users and associated devices, as well as disable or delete them.

Tuesday May 14

We prepared for the presentation. We created a slideshow and rehearsed the presentation and points to be talked about. We also ensured that the system was functioning as expected.

Wednesday May 15

We held our presentation for Uninett and Stein Meisingseth.

Saturday May 18

We worked on the final report and made corrections to the execution report.

Sunday May 19

The final report was completed.

We will submit all our work tomorrow, meaning that this is the last weekly report.

Remarks

We will push the most recent changes to Uninett's repository after submitting.
