Geelix LiveGames Alpha Test: Test Instructions

Carry out the following steps in order to complete the testing. If you have any questions, if a server is down or a client doesn't work properly – feel free to contact the author at ola.mogstad@geelix.com

Note: We treat all responses anonymously, however we ask that your put your email address in the Username field so that we can cross reference your answers with server logs.

1 Start the client

1.1 If already running, close the application and start it again to reset all fields

1.2 Enter your e-mail address in the "Username" field

1.3 Check "Grab input"

1.4 Select video bitrate: 512 Kbps

1.5 Note: While connected, if the Geelix logo, mouse cursor, or menu is of annoyance, press F10 or Insert to toggle

1.6 Leave everything else at default

2 Test Case: FarCry (First-person shooter)

2.1 Connect to the FPS server: 129.241.209.22:80 (Linux) / 129.241.209.22 (Windows)

2.2 Setup the game:

   2.2.1 In main menu, click: "Launch Demo" -> "Start"

2.3 Play actively for 3 minutes: Walk around, look around, try to shoot enemies. Hint: Use W to move forward and F to exit the boat, use the mouse to look around and to shoot

2.4 Press Shift+F12. Leave the game running and disconnect from the server by closing the video window. Do not close the client application

2.5 Select video bitrate: 1 Mbps (Linux) or 1.5 Mbps (Windows)

2.6 Repeat steps 2.1, 2.3 and 2.4

2.7 Select video bitrate: 3 Mbps

2.8 Repeat steps 2.1 and 2.3, click "Main Menu", and repeat step 2.4

3 Test Case: Black & White 2 (Real-time strategy)
