Repost Front-end

This is the front-end [Vue.js (https://vuejs.org/)](https://vuejs.org/) web server for Repost API.

Installation

[Node.js (https://nodejs.org/en/)](https://nodejs.org/en/) and [npm (https://www.npmjs.com/)](https://www.npmjs.com/) are required for building.

1. Clone the repository

```
git clone https://github.com/jonsondrem/repost-frontend.git
```

2. Navigate to the `repost-frontend` directory and install npm packages

```
cd repost-fastapi
npm install
```

3. Make changes to the .env file as needed. See [Configuration](#configuration) for details

4. Build the project

```
npm run build
```

Configuration

Configurations are made with environment variables before building. The easiest is using the provided `.env` file for further configuration. The following environment variables can be used.

- **VUE_APP_CLIENT_ID** - The OAuth2 client_id
- **VUE_APP_APIS** - Name of all APIs separated by ;
- **VUE_APP_API_0** - URL to the first API in the list defined in VUE_APP_APIS. Add more APIs by using VUE_APP_API_1 etc

Distribution

Use your favorite web server to host the files in the `/dist` directory.
