

Bachelor's Thesis 086

Sindre Haugland Paulshus

Week Report #4

Week of the year: 6
Date written: 14.02.2020

Done this week:

- Meeting summons 2 finished.
- Week report 3 finished.
- Requirements document finished.
- Started experimenting with the logic behind the FoW using raycasting, bresenham lines and finally DDA, which I got good results with.
- Had a meeting with supervisor.
- Held a demo for the client with the results so far.

Project Status:

Results:	Good
Calendar time:	Good
Work time:	Good

Problems:

The supervisor was not able to come to the scheduled meeting and was unresponsive to emails. We had to reschedule the meeting afterwards.

Solutions:

I will be sending out the meeting summons longer in advance, hopefully on the friday the week before the meeting.

Tasks next week:

Continue logic development with a focus on getting the FoW to be a circle.
