

Bachelor's Thesis 086

Sindre Haugland Paulshus

Week Report #2

Week of the year: 4
Date written: 24.01.2020

Done this week:

- Finished first draft of Project Plan with Gantt Chart.
- Finished first draft of Meeting Plan.
- Finished first draft of Vision Document.

Project Status:

Results:	Good
Calendar time:	OK
Work time:	Subpar

Problems:

I have clocked about 14 of 30 hours this week, due to being busy with personal business on monday when I usually should work and not making up for it on other days. I have also spent time on the "Systemtenkning med økonomi" course, which has weekly assignments.

Solutions:

As I get more and more into the project I will naturally spend more time on it and I will be able to retake all my lost time. Especially since I will soon delve into the problem and develop my solution.

Tasks next week:

There is the obligatory science theory days I will be attending. In addition I will have one day at the work space and one day at home where I will be writing the first draft of the Requirements document. Then the week after that I can set my teeth into programming and looking at different ways to solve the problem (hopefully). If I am able to do this I will be ahead of my Gantt chart, which is promising.
