

Report from project meeting: Bachelor's Thesis 086

Time and date: 14:00-16:00, 19.02.2020

Place: Room 322C, Sentralbygg 1, Gløshaugen

Attending: Sindre, Helge (supervisor)

Not attending: None

Chairman: Sindre

Case 01: Status Requirements Doc

Looks good. Can add more user stories if additional features/tasks are worked on.

Case 02: Status Results

Looks good.

Case 03: FOW Implementation Discussion

Idea for optimization: calculate an array of delta x/y positions for the edges of the view circle only ONCE (at start). Then use that array plus position of the unit.

Case 04: Anything else

Timesheet looks good.

19.02.2020, Sindre
