## Updates from last Sprint

Things that have been added since the last sprint

### Content added:

- Admin login
- Update reservation list on new reservation (popup)
- Checkbox GDPR
- Table-GUI with SVG (Making it not stretch out and look good on most resolutions)
- A pop-up with that tells you if the reservation is within 1 hour
- A pop-up if you manually click delete, you have to confirm it
- Click anywhere on the calendar input
- Hint added if you are more than 6 people
- Data deleted one day after reservation ends
- Some tests

### Content optimized:

- Table-GUI logic: Not have the option to pick more guests than a certain table
- SEO score,
- Code optimization (tslint)
- Better input checks (validation)
- Better Email confirmation
- Removed Nav link
- Deployment production with nginx server
- Table icon bug on safari/ios
- Disabled Mondays

## Goals for next sprint:

- Hash the password, then check if the password matches, then log in
- More Unit testing
- Get as close as achievable to a perfect "Lighthouse" score
- Fix available tables on the frontpage
- Table-GUI logic: If you are 4 people and select one table you can go further
- Bug: Sometimes when you are logged in and reserve a table, a popup appears at the "Confirmed Reservation" stage
- Fix the "open API" issue? <http://158.38.101.127:3000/api/reservations>
- Fix full height and reservation info line on table GUI on mobile
- Remove login for admin btn while logged in
- Writing on the bachelor thesis
