# 1. Arbeidskontrakt

## 1.1 Innledning

Denne arbeidskontrakten bygger på et sett med typiske mål, oppgavefordelinger, prosedyrer og retningslinjer for interaksjoner for studentarbeider. Arbeidskontrakten er utfylt med *egne* fortolkninger av hva man mener med disse og hvordan man skal oppnå dette. Roller og oppgavefordeling

## 1.2 Dokumentansvarlig/sekretær

Dokumentansvarlig/sekretær har ansvar for å ta møtereferater, screenshots av sprinter, og føre annen relevant dokumentasjon underveis i prosjektet. Denne rollen vil rulleres innad i gruppen på ukentlig basis.

Tomas Klungerbo Olsen tar denne rollen første gang i uke 2, og vil ha denne rollen hver partallsuke.

Lars Ivar Ramberg tar denne rollen første gang i uke 3, og vil ha denne rollen hver oddetalsuke.

## 1.3 Product Owner

Product Owner er bindeleddet mellom oppdragsgiver og utvikler-teamet. Product Owner er ansvarlig for å representere produktet, og har som mål å fatte beslutninger som kommer produktet til gode.

Product Owner har ofte ansvar for backlog og user stories, men i denne oppgaven vil ansvar for backlog og user stories deles mellom gruppemedlemmene. Product Owner vil derfor i hovedsak ha en kommunikativ rolle mot oppdragsgiver, og være ansvarlig for kommunikasjon.

Lars Ivar Ramberg vil være Product Owner for dette prosjektet.

## 1.4 Scrum Master

Scrum Master er ansvarlig for å kommunisere mål og retning til de resterende team-medlemmene. Scrum Master har ikke direkte ansvar for kommunikasjon med oppdragsgiver (dette ansvaret faller på Product Owner).

Scrum Master er en "tjenende leder" for teamet. Teamet skal i utgangspunktet være selvstyrende, og Scrum Master skal da ikke lede teamet direkte. Scrum Master skal påse at Scrum rammeverket blir fulgt og respektert.

Tomas Olsen vil være Scrum Master for dette prosjektet.

## 1.5 Kvalitetssikring

### 1.5.1 Kode

All kode skal gjennom en "review" før den aksepteres som del av endelig løsning. Rollen som kvalitetssikrer, eller "reviewer" vil tilhøre det gruppemedlemmet som ikke skrev den aktuelle koden. Dette gjøres for å forsikre kvalitet ved at begge gruppemedlemmene ser og godkjenner all kode som skrives.

### 1.5.2 Dokumentasjon

Kvalitetssikring for dokumenter vil være ansvaret til det gruppemedlemmet som ikke er forfatter av dokumentet.

## 1.6 Prosedyrer

### A) Scrum og utviklingsmetodikk

- a) Utvikling skal gjennomføres basert på Scrum metodikk.
- b) Hver sprint vil være en uke lange.
- c) Scrum roller og rolle-fordeling er beskrevet i avsnitt "Roller og oppgavefordeling"
- d) En ny sprint starter med sprint planning hver mandag etter daglig stand-up møte (se punkt B "Møter").
- e) Sprint review avholdes hver søndag etter daglig stand-up møte (se punkt B "Møter").
- f) En sprint avsluttes med sprint retrospective hver søndag etter sprint review.
  - i) I sprint retrospective skal det reflekteres over prosessen, ikke produktet. Sprint retrospectiven bør derfor ta for seg:
    - (1) Hva gikk bra?
    - (2) Hva gikk ikke så bra?
    - (3) Hvilke konkrete handlinger kan teamet ta for å forbedre det som ikke gikk bra, og videreføre/opprettholde det som har gått bra.
- g) Issue tracking skal skje i prosjektet sitt Jira-space
  - i) Alle oppgaver tilknyttet utvikling skal spores (trackes) i Jira-spacet. Oppgaver skal som hovedregel ikke utføres uten å bli sporet i Jira.
- h) All kode utviklet i prosessen skal samles i en GitHub repository.
- i) Den ansvarlige for GitHub repositoret skal forsikre seg om at repositoret er tilgjengelig for alle gruppemedlemmer, også etter at prosjektet er over, i minst et år etter sluttdato.
- j) Dersom det andre gruppemedlemmet ønsker tilgang etter året med tilgjengelighet, må de ta en kopi av repositoret før tilgjengeligheten avsluttes.
- k) Extreme-Programming metodikk kan implementeres dersom nødvendig.

### B) Møter

- a) Stand up møter skal gjøres daglig, mandag til fredag og søndag kl 08:00. Disse møtene skjer uten innkalling til faste tider i Microsoft Teams.
- b) Sprint møter skal skje hver uke i form av en sprint review, sprint planning, og sprint retrospective.

- c) Møter med veileder og oppdragsgiver skal skje annenhver uke, med start i uke 2, 2022. Disse møtene vil tilsvare en sprint review med demo, der arbeid vises frem til oppdragsgiver og veileder. Videre prosedyrer for innkalling er beskrevet i punkt C.
- C) *Møteinnkalling*
- a) Alle møter som ikke er stand up møter skal ha en formell innkalling.
  - b) Møteinnkalling skal skje over mail. Mail sendes til alle gruppe-medlemmer hver uke. Annenhver uke inviteres også veileder, kontaktperson hos oppdragsgiver, og annet relevant personell hos oppdragsgiver.
  - c) Annet relevant personell kan være veiledere eller interessehavere hos oppdragsgiver.
  - d) I møteinnkallingen skal det alltid være en lenke til et Microsoft-Teams rom der møtene holdes.
  - e) Møteinnkallingen må inneholde tidspunkt for møtet.
  - f) Møteinnkalling skal senest sendes ut tre dager før møtet avholdes.
- D) *Varsling ved fravær eller andre hendelser*
- a) Dersom man ikke kan møte skal dette meldes om så snart som mulig før møtet. Varsling skal skje over mail, og varslet skal gå ut til alle andre møte-deltakere.
  - b) Følgende ansees som gyldige grunner til fravær:
    - i) Uforutsett tap av internettforbindelse
      - (1) Herunder forutsettes det at gruppe-medlemmet tar tiltak for å møte likevel, som for eksempel å bruke mobilnett, eller dra til campus.
    - ii) Uforutsette, kritiske tekniske problemer.
    - iii) Sykdom
    - iv) Ulykke eller alvorlige personskader som hindrer arbeid
    - v) Død eller alvorlig sykdom i nære relasjoner
    - vi) Dødsfall
  - c) Ved fravær uten varsel brukes følgende system for sanksjoner:
    - i) Første fravær resulterer i samtale innad i gruppen. Samtalen bør diskutere hvorfor fraværet skjedde, og om det kan gjøres endringer for å unngå flere fravær.
    - ii) Andre fravær resulterer i samtale mellom gruppen og veileder. Samtalen bør også her fokusere på å diskutere hvorfor fraværet skjedde, og om noe kan endres for å unngå flere fravær.
    - iii) Ved tredje fravær vil det bli iverksatt separasjon av gruppen.
- E) *Dokumenthåndtering*
- a) Alt skal dokumenteres så langt det lar seg gjøre.
  - b) Ansvar for dokumentasjon skal rulleres hver uke (Se seksjon "Roller og Oppgavefordeling").
  - c) Følgende skal alltid dokumenteres:
    - i) Møter (møtereferat).
    - ii) Beslutninger vedrørende utvikling.
    - iii) Sprinter og fremgang, dokumenteres med snapshots underveis.
  - d) All dokumentasjon skal så langt det lar seg gjøre skrives og lagres i Confluence. Dokumentasjon som ikke lagres i Confluence skal lagres i en delt Google-drive som alle gruppe-medlemmer skal ha tilgang til.
  - e) Dokument-ansvarlig har frist til søndag kveld for å fullføre sin dokumentasjon.
- F) *Innleveringer av gruppearbeider*

- a) Alle innleveringer vedrørende rapport og dokumentasjon direkte knyttet til rapport, skal gjennomleses og godkjennes av alle gruppemedlemmer før innlevering.
- b) Alle innleveringer vedrørende rapport og dokumentasjon direkte knyttet til rapport skal levers innen gitte tidsfrister.
- c) Gruppearbeider skal være et kollaborativt arbeid der alle gruppemedlemmer deltar i utforming, godkjenning, og innlevering.

#### G) *Timeregistrering*

- a) All tid brukt på prosjektet, og arbeid direkte relatert til prosjektet, skal registreres
- b) Registrering foregår i Tempo, en plug-in for Jira.
  - i) Hver time skal registreres til en issue.
  - ii) Hvis arbeid gjøres som ikke kan registreres til en spesifikk issue, skal det registreres til en generell issue som kan representere. Arbeidet gjort.
  - iii) For eksempel vil etter-skriving av møtereferater kunne registreres på en generell issue/task ved navn "Referater" eller "Generelt dokumentarbeid".

## 1.7 Interaksjon

#### A) *Oppmøte og forberedelse*

- a) Alle gruppemedlemmer skal senest stille opp ved angitt oppmøtetidspunkt informert via mail.
  - i) For stand up møter skal gruppemedlemmene senest stille opp ved tidspunktene spesifisert i denne avtalen.
- b) Dersom et gruppemedlem stiller opp etter oppmøtetidspunktet ansees dette som en forsentkomming.
  - i) Forsentkomminger behandles på lik måte som fravær (Seksjon "Prosedyre", Punkt D).

#### B) *Tilstedeværelse og engasjement*

- a) Passiv underholdning tillates under arbeid. Passiv underholdning defineres som:
  - i) Musikk
  - ii) Video og streaming av video.
- b) Det er opp til hvert enkelt gruppemedlem å påse at underholdningen ikke distraherer fra arbeidet. Dersom underholdningen blir distraherende, selv om den er passiv, skal underholdningen utebli.
- c) Følgende underholdning skal til enhver tid unngås:
  - i) Dataspill.
  - ii) Facebook og sosiale medier.
  - iii) Lesing av materiale ikke relatert til arbeidet (for eksempel nettaviser).
  - iv) Vilkårlig surfing.
- d) Under møter er det forventet at alle gruppemedlemmer deltar aktivt og er engasjerte. Andre aktiviteter som ikke er relatert til møtet eller dokumentasjon av møtet skal unngås.

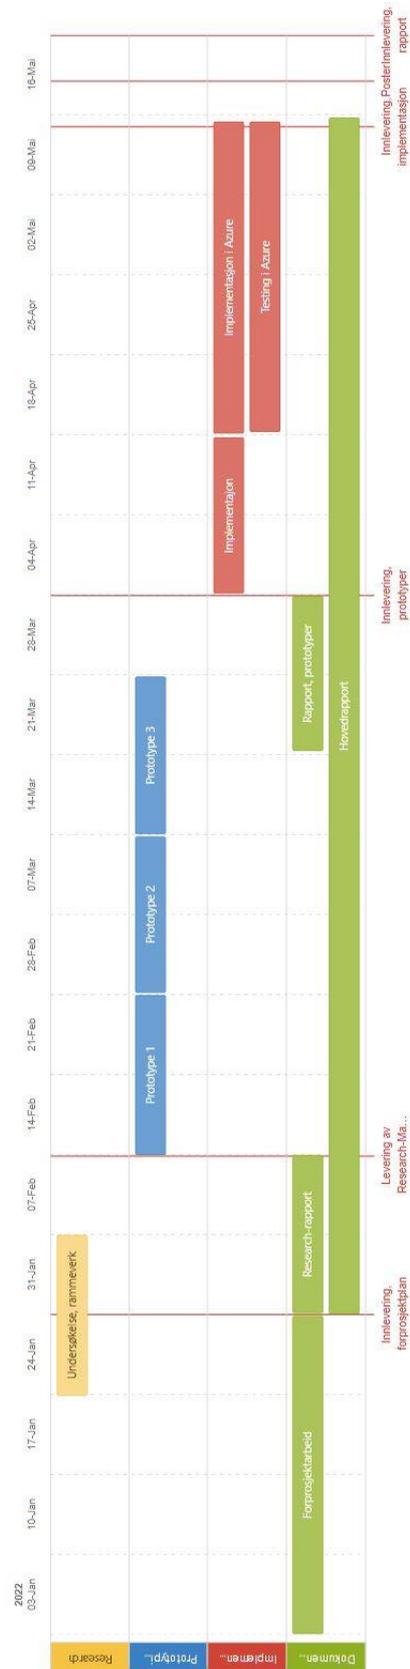

#### C) *Hvordan støtte hverandre*

- a) Gruppen skal fremme en kultur hvor det er lov å gjøre feil, stille spørsmål, og presentere konstruktiv kritikk.
- b) Alminnelig folkeskikk skal utøves til enhver tid. Trakassering og mobbing skal unngås.
  - i) Alvorlige tilfeller av trakassering ansees som avvik og kan ansees som grunnlag for å separere gruppen.
  - ii) Ved alvorlige tilfeller skal veileder inkluderes og gruppen skal prøve å løse uenigheter.

- iii) Dersom uenighetene ikke kan løses, selv etter møte mellom gruppemedlemmer og veileder, vil det iverksettes separasjon av gruppen.
- c) Alle ideer skal høres og behandles med respekt.
  - i) Ideer skal være åpen for kritikk, men kritikken skal være saklig og konstruktiv.
- D) *Uenighet, avtalebrudd*
  - a) Uenighet skal så langt det lar seg gjøre løses ved samtaler innad i gruppen.
    - i) Veileder kan involveres dersom uenighetene ikke lar seg løse innad i gruppen.
    - ii) Dersom uenigheten fortsatt ikke lar seg løse, vil et siste alternativ være å splitte gruppen. Dette skal unngås så langt som mulig.
  - b) Relevante avvik vil også være fravær. Fravær diskuteres og avklares i avsnitt "Prosedyrer" (Punkt D) av denne avtalen.

## 5.14 Sprint 1 Retrospective

Date	<b>24 Jan 2022</b>
Participants	<a href="#">Lars Ivar Ramberg</a> <a href="#">Tomas Klungerbo Olsen</a>

### What went well?

- Equally split workload
- Good communication. Stand ups everyday are very helpful.

### What can be done better?

- Tasks may need to be segregated so that not too many tasks are tied to a story, preventing it from completion. This week, no stories were completed because they were tied to tasks that were not completed on time.
- Time-tracking issues must be in place so all hours can be logged. As of now, hours are spread accross Jira, Toggl, and Excel as a result of lacking support for "general" time-tracking (meetings, writing e-mails, etc.)
- Some times/appointments need to be adjusted to account for INGA2300. As of right now, planning on mondays conflicts with lectures on mondays.

### Actions

- Define new time slots for meetings
- Finish setting up time tracking issues in Jira

## 5.15 Sprint 2 Retrospective

Date	<b>30 Jan 2022</b>
Participants	<a href="#">Tomas Klungerbo Olsen</a> <a href="#">Lars Ivar Ramberg</a>

### What did we do well?

- Team was flexible and had good communication throughout the sprint.
- Sprint was better planned regarding complexity per developer.

### What should we have done better?

- *Remember to upload resources to Google Drive as fast as possible.*
- *When sharing access to frameworks e.g. Overleaf, the sharer should inform the other participants on which account it was shared to.*
- *Keep better track of Jira issue board to reflect the current state of the project.*

## 5.16 Sprint 3 Retrospective

Date	<b>06 Feb 2022</b>
Participants	<a href="#">Lars Ivar Ramberg</a> <a href="#">Tomas Klungerbo Olsen</a>

### What went well?

- Good cooperation in order to finish tasks
- Good communication and transparency with daily stand-ups
- We finished 100% of sprint tasks, despite a busy week

### What should have been done better?

- Work could have been done on more days of the week

## 5.17 Sprint 4 Retrospective

## 5.18 Sprint 5 retrospective

Dato	<b>20 Feb 2022</b>
Deltakere	<a href="#">Lars Ivar Ramberg</a> <a href="#">Tomas Klungerbo Olsen</a>

### What should we have done better?

- Issues are too big and cover too many topics

### Actions

- [Lars Ivar Ramberg](#) and [Tomas Klungerbo Olsen](#) have agreed to not pick new issues when there are issues in review. Follow this up.
- Leftover issues must be completed this week.
- [Lars Ivar Ramberg](#) Will inform Asle about the delay

## 5.19 Sprint 6 Retrospective

Date	<b>28 Feb 2022</b>
Participants	<a href="#">Tomas Klungerbo Olsen</a> <a href="#">Lars Ivar Ramberg</a>

### What did we do well?

- *Taking advantage of pair programming to manage complex/unknown solutions.*
- *Good communication with counselor and stakeholder.*
- *Good communication within the development team.*

### What should we have done better?

- *Should find a compromise for pair programming work hours.*
- *Should write more in the report.*

### Actions

- Find hours during the day in which both developers can work as a pair.

## 5.20 Sprint 7 Retrospective

Date	<b>07 Mar 2022</b>
Participants	<a href="#">Lars Ivar Ramberg</a> <a href="#">Tomas Klungerbo Olsen</a>

### What did we do well?

- *Started to catch up on tasks in relation to the milestone plan*
- *Well structured project is paying off, leading to more effective development*
- *Code from last prototype has been effectively reused*

### What should we have done better?

- *Most of the work is done at the end of the week as a result of other obligations*

- [Tomas Klungerbo Olsen](#) and [Lars Ivar Ramberg](#) Go back to stand-ups as usual

## 5.24 Sprint 11 Retrospective

Date	<b>04 Apr 2022</b>
Participants	<a href="#">Lars Ivar Ramberg</a> <a href="#">Tomas Klungerbo Olsen</a>

### What did we do well?

- Good Communication
- In theory, good distribution of work

### What should we have done better?

- Little progress due to sickness, high "bus-factor"
- Stakeholder could have been informed of delay due to sickness sooner
