

# Weekly Meeting Report

Ole Einar Kværnsveen Belboe

Elias Loe Eritsland

Admir Meta

May 3rd 2023

## 1 Meeting overview

In this meeting, the Kalman filter implementation was presented. The results were not elaborated upon in the meeting, but they will be included and described thoroughly in the report. The Kalman filter implementation has been finalized, and will no longer be discussed further.

The bias tests have been completed. The results have not been compiled yet, however. They will be discussed during the next meeting.

The supervisors have recommended the first changes to the first draft of the report. These changes will be finalized within the week.

### 1.1 Conclusions from the meeting

- The Kalman filter has been implemented. The results will be described in the report. The design is considered finalized.
- Bias tests have been completed. The results will be processed and presented next week.
- The first changes to the report have been recommended. They will be finalized within the week.
