

Project Agreement

Progress Interactive AS

This document defines the 'Project Agreement' between the Signatories and Progress Interactive AS. The Project is defined as a collaborative exploration of software features defined by Progress Interactive AS. This is due to be explored as part of the Signatory's Bachelor-level academic project that ends at the end of May 2023. It is jointly agreed that this code may be utilized by Progress Interactive for commercial activities, either directly or indirectly through derivations or research activities. Progress Interactive AS has full usage and ownership rights without restriction, although the Signatory retains their right to access, develop, promote and claim credit for their work as it was delivered in the repository by the end of May 2023. The code can be freely distributed under the MIT licence and should not be credited to Progress Interactive AS, although any further work in the repository that is submitted after May 2023 cannot be distributed and is considered solely the Intellectual Property of Progress Interactive AS.

In regards to all other Intellectual Property belonging to Progress Interactive AS that has or may be discussed, the Signatory agrees that all intellectual property ("Property") and confidential information ("Confidential Information") belonging to **Progress Interactive AS** ("Progress Interactive"), whether that property and information is defined as financial or business information, which is either non-public, confidential or proprietary in nature, including, without limitation, trade secrets, business plans, marketing plans, research, software, artwork, assets, hardware, technical data, specifications, financial information, vendor information, client information as well as all information labeled "confidential", whether disclosed in writing or orally, which by its nature would be reasonably considered to be confidential, will not be disclosed, discussed or distributed publicly or to any third parties without the expressed written consent of **Progress Interactive**. Should a situation arise where there is uncertainty whether or not unlabeled information or property is confidential, then I agree to request a written statement of consent from **Progress Interactive**, which must clearly define whether or not the information or property is confidential, and until such time of this statement being received and receipt acknowledged in writing, the information or property will be assumed as confidential.

I commit to immediately returning or destroying any or all copies of the disclosing party's confidential information and property that may be in my possession as requested at any time. I am responsible for holding all confidential information and property in strict confidence, protecting it with at least the same care which I give to my own most confidential information (but in no event less than is reasonable).

This agreement shall be governed by the Laws of Norway. Signatures can be found on page 2.
